

## Budgerigar-Parrot Soft Food Recipe & Preparation

The Food Supplements may be mixed with dry seed or provided in this high protein high energy soft food mix. Breeding birds will climb the wire in eagerness to eat this tasty and highly nutritious soft food mix. Additional E-powder and F-vite may also be provided in small dishes where they are eaten as required.

### Ingredients

- \* High protein Breeding Crumbles - 1 cup (250gm)
- \* Turboboster - 20-40ml - more is better
- \* Quik gel - 2mls dissolved into 5mls of water  
-or 2mls/100ml drinking water.
- \* E-powder - 50 -100gm - more is better
- \* F-vite - 20gm (2 tablespoons)
- \* Eggs - 2 - 12 hard boiled eggs - number by availability

### Frequency of Soft food Administration

- \* Breeding Pairs - Each day or each second day
- \* Weaning cage - Each second day
- \* Young bird flights - Each second day
- \* Moulting Period - Each second day
- \* Non-breeding birds - For two days each weekend

### Preparation of Soft Food

#### Step 1

Use a fork to mix Turboboster and Quik gel throughout Breeding Crumbles, then rotate sealed container vigorously to complete mixing process. Place in a refrigerator overnight in readiness for a morning feed.

Measure

Add

Mix

Agitate

Refrigerate

#### Step 2

Breeding crumbles will be dry again by next morning. Mix E-powder & Fvite thoroughly through the crumbles. Eggs are boiled immediately prior to this process.

Next morn

Boil eggs

Add Epowder & F-vite

Agitate

#### Step 3

Process eggs using a mouli (or food processor) then mix thoroughly into the prepared crumbles to produce the light fluffy finished product.

Mouli

Process eggs into mix

Agitate

Finished

#### Step 4

Final product placed in finger drawers. Enjoy the results of increased fertility, health and size. This soft food avoids the contamination often experienced using soaked seeds.
